4. Fajar Ejaz (21L-5282)
5. Zainab Ejaz (21L-1791)

1. Problem Statement:

Many individuals have books they no longer need or want, while others are seeking specific titles or genres. However, there is often no efficient platform for them to connect and exchange books locally. As a result, valuable resources remain unused and inaccessible to those who could benefit from them. LitXchange aims to address this issue by providing a platform where users can easily find and connect with others in their area to exchange books.

2. Project Scope:

LitXchange will be a mobile application developed using Flutter and Firebase. The app will allow users to create profiles, list the books they have available for exchange, and browse through listings of books offered by others. Users will be able to get contact information to arrange book exchanges with other users.

3. Tools and Technologies:

- **Flutter:** For cross-platform mobile app development.
- **Firebase:** For backend services including user authentication, real-time database, and cloud storage.
- **Flutter Packages:** Various Flutter packages will be used for UI components, state management, and networking.
- **Version Control:** Git for code versioning and collaboration.

4. Review of Similar Existing Projects:

Several book exchange platforms exist, such as BookMooch and PaperbackSwap, which allow users to exchange books by mail. However, these platforms may lack the immediacy and convenience of local exchanges. Other apps, like Goodreads, focus more on book discovery and social interaction rather than direct exchanges. LitXchange aims to differentiate itself by facilitating local, face-to-face book exchanges.

5. What Makes our Project Different:

LitXchange stands out from existing solutions by prioritizing local book exchanges and providing a convenient and efficient way for users to connect with others nearby. By emphasizing in-person interactions, LitXchange fosters a sense of community among users and encourages sustainable practices by promoting the reuse of books within local neighborhoods.

Through LitXchange, we aim to promote literacy, foster community engagement, and contribute to environmental sustainability by facilitating the sharing and exchange of books among individuals.
